

Welcome to your Recon Suite...

presented by AutoMobile Technologies

AutoMobile Technologies has developed “best in class” software that will help you fully automate and manage your automotive reconditioning business; saving you time, money and resources. The only hard part is choosing the best product for you. We have broken down the Recon Suite here, so you can easily choose which solution is best for your type of business.

Are you a reconditioning specialist? Business owner? Contractor?

ReconPOS is the essential tool for any-sized automotive reconditioning business; giving you the professional look and feel your business organization needs. ReconPOS was specially designed for auto reconditioning companies. Scan VIN, create an estimate, take damage pictures and track all this information digitally. ReconPOS easily integrates with QuickBooks® and other accounting and payroll software. Recon POS will give you the resources you need to successfully run and manage your business within your budget, offering individual licenses with the full functionality of the Recon Suite. Recon POS allows you to effectively track all services including; paintless dent repair, paint touchup, interior repair, wheel and windshield repair, auto detailing and other.

Are you a reconditioning company managing multiple mobile teams? Do you service dealerships and wholesale clients with more complicated requirements?

ReconPro was developed specifically for auto reconditioning companies and the dealerships where they often perform services. ReconPro includes all the features included in ReconPOS plus adds new powerful tools to manage larger workforce and wholesale clients (like dealerships). We offer ReconPro in two packages:

ReconPro – Team Edition. In addition to all ReconPOS features (like digital inspections, invoice creation and printing, pictures, credit card processing and many more...) ReconPro allows you to track employees timesheets, individual and team productivity, technicians commissions, work order dispatching from the back office and status tracking.

ReconPro – Enterprise Edition. In addition to all Team Edition features, enterprise edition provides you and your important wholesale clients new level of services, such as managing separate price lists per dealership, ability for your clients to have access to your back office, view and automatically receive in digital form reports, notifications, invoices etc. We can integrate with dealership internal software, so you can receive ROs directly on your PDA or submit invoices electronically to dealer accounting.

Major Features:

- Fully digital and fully mobile – runs on your phone or PDA
- Process Credit Cards at the Point of Sale right from the PDA
- VIN numbers scanning and decoding
- Graphical inspection forms with touch-screen capability
- Capture signature, pictures and other media related to inspection or invoice
- Print inspection forms and invoices on-the-spot or email them as PDF to your clients
- Integration with your accounting and payroll software
- Real time wireless data tracking. See results on easy-to-read dashboard and reports
- Track timesheets, technicians productivity and commissions
- Wirelessly dispatch and track execution of work orders and service requests
- Give your wholesale clients access to their invoices, performance reports, etc
- Maintain separate price lists for your clients
- Integrate with Dealership software to receive/submit orders and statuses

* The Recon Suite of products (and additional software) are currently available on mobile devices operating with Windows Mobile OS or Windows XP, Vista and Windows 7 on Tablet / Desktop computers. Versions for Android and iPhone platforms will be available in Spring / Summer of 2010.

Increase your Recon Functionality!

AMT has developed a wide range of add-ons for any of the Recon Suite of products. Get the most out of your Recon software by pairing your solution with one or more of the add-ons below.

Recon WebBuilder

Get Online! – **Recon WebBuilder** can help you take your business online. The web builder provides you with multiple customizable templates for you to build your personal business website. This content management system is a plug-and-play integrated software that enables you to get your business up and online quickly, without adding hundreds of dollars to your overhead cost. And best of all – Recon WebBuilder integrates with all Recon products. (For example – you can allow your clients to see their invoices/estimations online or give them the opportunity to submit service request from your site directly to your PDA.)

Everyone is online; Recon WebBuilder makes it easy for your business to be!

ReconCRM

Don't let sales opportunity to go away! Lost lead is a lost sale. Use the best Customer Relationship Management (CRM) practice and techniques with your clients! **ReconCRM** can help you to monitor, follow-up, stay connected with your customers. This web-based software will track your sales opportunities or keep in touch with previous customers, automate your sales follow up workflow and provide you reminders. It is specially designed for the automotive industry and integrates with your Recon software.

InspectionNotes

Error-free Information Management – **InspectionNotes** allows you to collect comprehensive inspection information including pictures, graphical splash screens etc on your PDA or mobile phone. If you buy or sell cars at auctions – this tool is what you need! You can manage and store all vehicle information and history with **InspectionNotes** and have real-time updates.

ReconLeads

Leads, Leads, Leads! – What's more important than existing customers? New ones! **ReconLeads** is a specialized database created for the automotive reconditioning industry. If you are looking for more work, or there is something in your work order that you don't specialize in, **ReconLeads** is there to provide you referrals or allow you to post referrals for other automotive professionals. This comprehensive database is an essential tool for every reconditioning expert and the first business exchange of its kind in the industry.
